

Cloud Applications Consultant

Professional Services Delivery

1 Job Summary

The Cloud Applications Consultant is an individual contributor who will create and update technical specifications, forms and maps using OpenText translation software, carry out integration tasks to deploy forms and maps to pre-production and production environments, and setup Trading Partner connectivity using common communications standards such as ftp, http, AS2, and SFTP.

2 Key Performance Areas

- Engages and discuss with the client to obtain project requirements like project scope / details, EDI requirements and trading partner information etc., ensuring the completeness and accuracy of map packages and requirements documentation while developing and maintaining good customer relations
- Understand customer ERP interfaces and data requirements and identify the best approach in meeting customer's expectations
- Contributes information towards continuous improvement and participates in innovation and process improvement aligned with organization goals.
- Defines and develops B2B integrations including planning with Onshore counterparts in identifying the best solutions, documentation, implementation, testing, troubleshooting, and deploying customer connections with trading partners and providing post-production support
- Provide information and initial analysis on root-cause-analysis discussions during testing and post-production
- Delivers day to day implementation requests of Trading Partners and map configurations of simple and moderate complexity into the OpenText Managed Services systems
- Implements changes for existing data integrations
- Follows policies and best practices when defining map rules based on client's requirements

- Delivers project status updates to clients, delivery/project managers and counterparts as necessary
- Creates and conducts trainings as required (brown bag sessions, info sharing, etc.)
- Provides technical consultation to new hires

3 Requirements

- Educational Requirement: Computer Science degree/other technical discipline or equivalent experience
- 3-5 years of working experience as an IT professional
- Advanced Programming knowledge and experience with any software development tools
- Must be willing to be on-call beyond normal working hours and on weekends
- Must be willing to work on shifts (can be ASPAC, EMEA or US)
- Preferably Knowledgeable in EDI standards, and B2B integration

4 Key Competencies

- Strong customer focus, customer satisfaction oriented
- Quick learner and able to retain a broad range of information in a rapid and complex technical environment
- Ability to make sound and well-informed decisions and understand their impact and implications.
- Demonstrate problem solving skills and logical thinking techniques and have excellent attention to detail. Ability to Identify and analyze problems; distinguish between relevant and irrelevant information to make logical decisions; provide solutions to individual and organizational problems. Develop reasonable options for solutions.
- Excellent Teamwork/Collaboration skills; Inspires and motivates others toward goal accomplishments; develops and sustains cooperative working relationships
- Ability to handle multiple priorities in a fast-paced environment and be able to work independently. Must possess effective time management skills.
- Must have good communication (written and oral) and interpersonal skill
